

Postdoctoral Positions in Biomaterials and Bioengineering at UC San Diego

A postdoctoral position in the area of biomaterials is available immediately at Bioengineering Department, University of California, San Diego (UCSD). The successful candidate must have a strong background in polymers with extensive experience in polymer synthesis and characterization, organic chemistry, and biomaterials. Experience in cell and molecular biology, tissue engineering, and stem cell research is preferred. Proficiency in English, both written and verbal, and demonstrated independence are required. The successful candidate will be part of a multidisciplinary team. For details about our research activities, please refer to our website <http://biosel.eng.ucsd.edu>.

Interested applicants should send in a brief statement of their research interests and career goals, complete CV, and three letters of recommendation to Prof. Shyni Varghese at svarghese@ucsd.edu. Applications should be sent as a single PDF email attachment.
